### (54) Title: COMMUNICATION DEVICE WITH SINGULAR CONTROL BUTTON

#### (57) Abstract

The invention describes a communication device (1) that employs a main button (2) for control of a screen cursor (44) or other graphical objects on the display (51) and for input of alphanumeric data, where the main button comprises a key with switch functions that is mounted on a guide plate that can be moved in all directions within a delimited area of a plane.
